Section 18 - Diagnosis Codes**SECTION 18—DIAGNOSIS CODES****18.1 GENERAL INFORMATION**

The diagnosis code is a required field and the accuracy of the code that describes the participant's condition is important.

The diagnosis code *must* be entered on the claim form exactly as it appears in the ICD-9-CM. Note that the appropriate code(s) may be three, four or five digits, depending upon the patient's diagnosis. The fourth and fifth digits give greater detail or specificity, and *must* be used as applicable to the patient's diagnosis(es) when available.

This section contains a listing of the most commonly used diagnosis codes.

ICD-9 –CM books may be purchased at any medical bookstore.
